Which specific candidates/applications are driving the most cost and activity?

Candidate Application Behaviour
This section provides an overview of how candidates engage with available job opportunities and the outcomes of their applications. Abdullah Tufail has submitted the highest number of applications with 2 applications recorded during the selected period. Meanwhile, Abdullah Tufail has applied across the greatest number of different job roles. The Applications per Candidate by Job Title analysis provides further context by showing the specific positions associated with this broader application activity.

Applications Requiring the Most Staff Effort
Recruitment effort is not distributed equally across all applications. Anaya Iqbal — Interviewed has consumed the highest amount of staff time, with 530 minutes recorded during the selected period.This highlights applications where operational effort is most heavily concentrated and may indicate cases that require additional review or investigation.

Applications with the Greatest Process Activity
Some applications require more interactions and process steps than others. Ahmed Ahmed — Shortlisted has recorded the highest number of recruitment actions, with 25 actions completed. A high number of actions may indicate repeated reviews, multiple recruitment stages, or increased back-and-forth throughout the application process.

Detailed Activity Investigation
The detailed session explorer connects recruitment activity across the responsible user, candidate, job, action, and recorded session information. This provides a complete operational trail for investigating individual applications and helps explain who performed the work, for which candidate and job, what actions were completed, and how much time was recorded. It allows high-effort or high-activity applications identified in the analysis above to be examined in greater detail.
